DESIGN BEATS FLIES

THE FLYING INSECT EXTERMINATOR FOR USE IN
COMMERCIAL ENTERPRISES

AREAS OF APPLICATION

Bakeries, butchers, commercial kitchens, restaurants, hotels

HOW IT WORKS

Attracting insects with UVA light with a wavelength of 360 nm: harmless for animals and humans! Catches reliably with non-toxic adhesive film!

PROTECTION AGAINST FLYING INSECTS

FOR COMMERCIAL AND INDUSTRIAL ENTERPRISES AS WELL AS IN THE PRIVATE SECTOR

The fly and wasp trap for tough jobs on commercial premises: bakeries, butchers' shops, large kitchens, restaurants and hotels – wherever cleanliness and hygiene are of the essence!

The stainless steel reflector in the OMEGA format brings the two powerful 20W UV-A fluorescent lamps to peak performance when catching flies and wasps and other harmful and annoying flying insects.

TECHNICAL SPECIFICATIONS

CM 40

Width	208 mm
Depth	107 mm
Height	410 mm
Weight	4.1 kg
Film holder	Stainless steel, V2A
Cable with Schuko plug	2.7 m
Wall bracket	Comes as a standard
Lamps	2x 20 W UV-A
CE marking	Yes
Adhesive film	1200 cm ²

NO POISON

Adhesive films and adhesive substances are non-toxic and do not pollute the environment with their waste.

NO SMELL

No unpleasant combustion smells, such as those produced by high-voltage grids.

NO NOISE

Both tiny and large flying insects are caught in complete silence, without the annoying, crackling and cracking spark noise that causes a disturbance when high-voltage grids are used.

ENVIRONMENTALLY FRIENDLY

No insecticides used
